WORK EXPERIENCE

FULL-STACK ENGINEER   2024
Freelancing

Berserker Program (latest project)
Berserker App is not just a fitness app; it's a NextJS PWA masterpiece, leveraging the latest web development features. As the brainchild behind the design, prototyping, and full-stack development, I've reimagined how coaches submit programming and how athletes conquer their workouts.

- NextJS Marvel: Experience the power of the latest NextJS features for a lightning-fast, dynamic fitness journey.
- Sleek Design: A visually stunning interface that makes engaging with workouts a pleasure.
- Secure Authentication: Powered by ClerkJS for robust and stylish user authentication.
- Data Backbone: The beating heart of the app relies on Xata, a Serverless database platform backed by PostgreSQL.

SOFTWARE ENGINEER   2021-2023
Medallia - Madrid

Led UX analysis for diverse client webpages. Spearheaded app redesign, by creating a React component library and the integration with a new API for data-driven components. Managed deployment pipelines and environments.

FULL-STACK DEVELOPER   2019 - 2021
Wunderman Thompson - Buenos Aires

Developed and maintained both frontend and backend components, handling business logic, data manipulation, and web content management. Proficient in email marketing and automation for comprehensive web solutions.

DATA ANALYST (PAYROLL)   2017-2019
Police of Buenos Aires - Buenos Aires

Managed payroll data analysis, reporting, and discrepancy resolution in collaboration with cross-functional teams. Identified process improvement opportunities, ensuring data integrity and confidentiality.
